Safety

All (heavy) lifting, hoisting, rigging and specialised transport operations are high risk activities if they are not planned and executed properly. They can often put people at great risk of injury, as well as incurring great costs when they go wrong. It is therefore important to properly resource, plan and organise (heavy) lifting, hoisting, rigging and specialised transport operations so they are carried out in a safe manner.

For critical, complex and high-risk operations, the planning and organisation shall be extensive and meticulous. When there are gaps in this cooperation it could result in even higher potential risks. This is where Cranes for You can play an important role. All concerned parties on site generally experience our involvement as an additional catalyst to reduce risks and operate safely.

- Setting up a Safe System of Work or company specific Policy
- Technical assessment of existing Safe System of Work
- Conduct audits to assess compliance, knowledge and gaps
- Equipment & resource qualification/certification
- Incident and accident investigation, analysis and determination of Root Cause
- Expert witness services for litigation support for contractors, insurance companies, and attorneys

Engineering

Safe and seamless project execution requires detailed planning and engineering, which is at the heart of every successful lifting and transportation project.

Transportation of heavy- and over dimensional components may have a number of unpredictable impacts on your budget and schedule if not meticulously planned from the very beginning. Depending on local regulations and condition extensive adjustments on existing infrastructure may be necessary and imposed.

Expertise alone is not enough. Engineering firms and contractors want to work with subcontractors that are responsive, motivated, and team-oriented. Cranes for You prides itself on meeting challenges and solving problems collaboratively with its clients. That is why we are known for being contractor friendly.

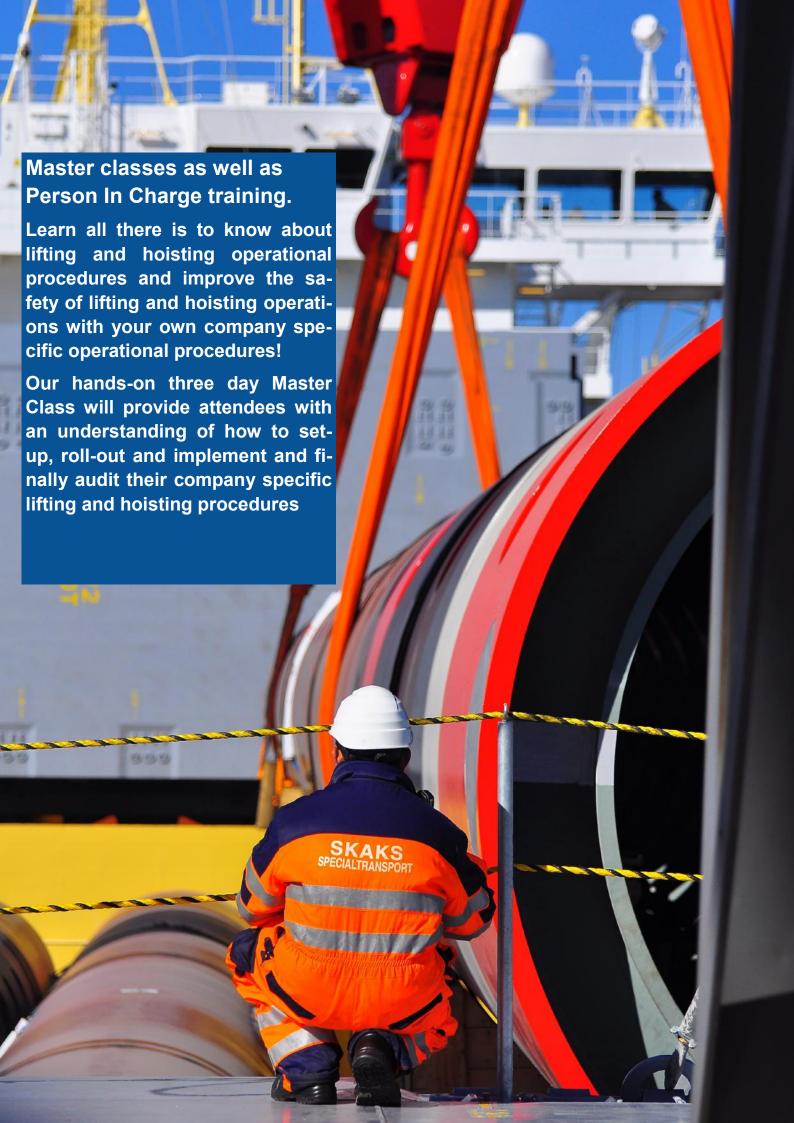

- Construction methodology
- Modularisation decisions and module design
- Design of special lifting devices, lifting beams, spreaders, triangles etc.
- Project specific Method Statements
- Rigging and stability calculations
- Load-out and Ro-Ro procedures and handbook
- Load spreading calculation and design

Training and education

The term "certification" is often used rather loosely. Generally, it means that some organisation is willing to state that an individual is capable of performing a specific task to that organisation's standards. Just as with crane certification, however, the process is relatively meaningless if the standard that is being certified to is not stringent enough, or is flawed in some other way.

Whatever your job title or functional role in (heavy) lifting, hoisting, rigging and specialised transport Cranes for You can supply you the optimal training or education. Be it OPITO, API or LEEA approved training, country specific requirements such as the Dutch TCVT or European ECOL, or required as per industry association, we will make sure your personnel holds widely accepted certificates, thus making sure you get value for money.

FUNCTIONS WE SUPPORT

- Technical Authority
- Subject Matter Expert
- Rigging Engineer
- Heavy lift Project Manager
- Crane and transport supervisor
- Lattice boom and offshore heavy lift crane operator
- Mobile crane operator
- Overhead Travelling Crane Operator
- Pile driving crane operator
- Rigger and load handler

Consultancy

The consultancy services we provide are not limited to 'Green-field' sites, they are of equal benefit to 'Brown-field' sites in addition to Turn-Around/ Shutdown projects. Not limited to office based desk study duties but continues to the construction phase by integrating into our client's project team. Our objective is to assist in the development of operational planning, which has minimum risk of schedule overrun and maximises safety while complying with all relevant statutory regulations, engineering codes and good working practices. manner.

A significant amount of Cranes for You's appointments is the independent 3rd party technical audit (technical check and safety audit) of contractors' (heavy) lifting, hoisting, rigging and specialised transport proposals. Not influenced by the potential preferences of any contractor and/or equipment sup-

- Optimal land transport and load movement determination: sliding, rolling and or SPMT's
- Lifting/hoisting method determination: by crane, hydraulic lift/ jacking systems, mast/tower lifting systems
- Independent review of lifting, hoisting, rigging and transport proposals prepared by others
- Verification of engineering and design calculations
- Verification of personnel qualifications and competences

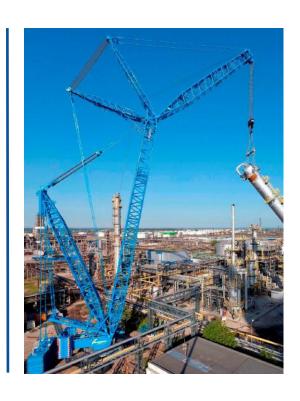

Management

Cranes for You offers (heavy) lifting, hoisting, rigging and specialised transport management services to clients in a wide variety of markets. Our team of highly trained and experienced specialists all have extensive experience. If you are short on resources in your project management department we can help you out on any project, be it onshore or offshore, be it big or small, just one heavy lift or all your lifting, hoisting, rigging and specialised transport operations of a full project.

Whatever management role needs to be filled: lifting project manager, lifting and rigging engineers, HSE specialists focussing on lifting, hoisting, rigging and transport, project consultants, you will find them in Cranes for You's team. And in case you do not find them in our team, we will contract one through our manpower services department. All of them are reference checked and identity checked.

- Hazard identification, risk assessment and risk management
- Preparing tender documentation and requests for quotations
- Evaluation of tenders and proposed lifting and transport methods
- Technical drawings in 2D/3D
 CAD and 3D animated lifting and transport studies and plans
- Structural analysis and lashing calculation
- Barge stability calculations, design of sea fastening

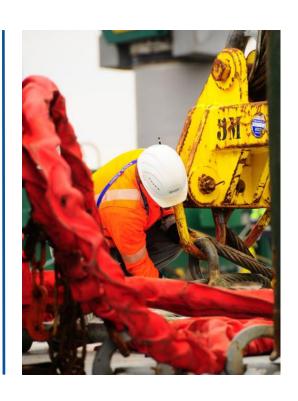

Manpower

The manpower services of Cranes for You are branded "want-to-hoist-for-you" - 12hoist4u. Founded in 2008, 12hoist4u is specialized in staffing the market niche for (heavy) lifting, hoisting, rigging and specialised transport with competent and experienced personnel. Our 12hoist4u professionals are well trained, certified and motivated to securely and efficiently support our clients for short or longer periods of time. 12hoist4u's ambition is to bring professionals and clients together all over the world.

If you require a professional for a few weeks, several months or a year we have the expertise to source the best personnel for your organization. You will experience a high level of service and support with your temporary staff requirements using 12hoist4u personnel. Our consultants are accredited and qualified to assist both our clients and candidates with their employment needs.

WE SUPPLY PROFESSIONALS

- Appointed Person—Person In Charge—Lift Director
- Crawler crane operator
- Lattice boom and offshore heavy lift crane operator
- Offshore pedestal or knuckle boom crane operator
- Tower crane operator
- Self-Propelled Modular Transporter (SPMT) operator
- Pile driving and diaphragm wall crane operator
- Rigger and load handler
